

HVAC Applications Engineer

North American Mechanical, Inc. (NAMI) is seeking to fill an HVAC Applications Engineering position in our Building Automation Team. Our Building Automation group oversees the design, installation and services associated with integrated building automation and security systems primarily in the state of Wisconsin which consistently delivers optimal customer based integrated systems that control all aspects of building operations such as HVAC, Lighting, Access Control, Security and IP Video/CCTV. This person works with the project manager, software engineer, and the construction engineer to execute successful building automation systems in commercial markets.

Responsibilities of the BAS Applications Engineer include:

- Develop project specific equipment schedules, drawings, submittals and commissioning sheets per NAMI standards
- Develop sequences of operation to ensure system operates as required
- Write, compile, and verify control applications for HVAC and Integrated system
- Support the Project Manager, Construction Engineers, and Software Engineers
- Develop and provide technical training to internal staff and NAMI customers
- Support the installation team

The right candidate must be:

- Well organized, detail oriented, highly motivated and a quick learner
- Knowledge of Building Automation and Controls is required; 2-4 years HVAC Applications experience, preferably with Schneider Electric / Andover Controls Continuum Controls
- Understanding of networking, temperature controls and integrated systems; Working knowledge of MS Word, Excel and Visio
- Ability to work in a team environment while taking responsibility for individual tasks
- Strong written and oral communications skills
- Knowledge of AutoCAD is desirable

A career at North American Mechanical - Comfort Systems USA means being part of a team and being proud of it! It means working safely and exceeding customer expectations.
